EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312.

To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

[1] Authorization for this examiner's amendment was given in a telephone interview with Mr. Gary D. Fedorochko (Reg. No. 35,509) on December 15, 2005.

[2] The application has been amended as follows:

In claim 1, replace claim 1 with the following:

A method of producing a depth map including the steps of:

- identifying and numbering each frame of a video sequence;
- identifying at least one object within the video sequence;
- allocating an identifying tag to each object;
- dividing the video sequence into a plurality of partial sequences;
- transmitting the partial sequences to a plurality of operators, each operator determining and defining an outline for each object in the partial sequence previously allocated said identifying tag;
- receiving said partial sequences from said plurality of operators;
- collating said partial sequences to reform the video sequence;
- allocating a depth tag to each object; and

adding security measures to the sequence prior to said video sequence being divided into a plurality of partial sequences, wherein the security measures include removing audio from the video sequence and modifying the colors of the video sequence.

In claim 2, please cancel claim 2.

In claim 3, please cancel claim 3.

REASONS FOR ALLOWANCE

[3] The following is an examiner's statement of reasons for allowance: The instant invention is a distributed image processing method.

Prior art was found for the claim and applied in non-final office action. Applicant uniquely claimed a distinct feature in the instant invention, which are not found in the prior art, either singularly or in combination. The feature being "security measures include removing audio from the video sequence and modifying the colors of the video sequence". Prior art was found for removing audio from a video sequence [*US 5,418,853: Column 2 Lines 32-37*]. Prior art was found for modifying the color of the video sequence [*US 5,809,139: Column 5 Lines 4-21*]. However, there is inadequate motivation to combine these teachings with those of Eleftheriadis and Mackinnon.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

[4] Claims 1 and 4 are allowed.
